

Big Blue/High Flow Triple 20"x4.5" Whole House Water Filtration System

Installed on mains plumbing, Pure4Sure's 3-stage Big Blue filtration system is capable of purifying water flowing through all faucets and showers across the premises, at up to 50 litres per minute. Engineered to ensure the health and safety of your family, it effectively eliminates thousands of contaminants present in your water supply, including chlorine, sediment, bacteria, heavy metals, and numerous others.

This system is specifically designed to cater to areas where a high flow rate is needed, for example an entire house, industrial area or commercial premises.

This system meets The WaterMark specification AS/NZS 3497:1998 Amdt 1 2001 Drinking water treatment units—Plumbing requirements.

Features of the system-

- High Grade 304 Stainless Steel Bracket
- Stainless Steel Pressure Gauges x 3
- 1" Brass Port/inserts
- Made in Taiwan

Filters Description-

Stage 1 – Polyspun Sediment Pre-Filter (10-1 microns)

Stage 2 – Carbon Block Filter Cartridge – 5 microns

Stage 3 – Anti-scale Coconut Carbon Block Filter Cartridge – 1 micron
